

MADHATTERTM
lamp recycling program

MADHATTER - Lamp Recycling Program

As a nation we know that Mercury is a toxic metal that is hazardous to both the environment and public health. There are well over 500,000,000 spent lamps thrown into the dumpster every year, not only is this illegal but it also causes more mercury contamination of the environment than any other consumer product.

MADHATTER - Lamp Recycling Program is a cost effective pollution prevention service that is simple to use and is specifically designed for smaller quantities of lamps. After a call to PestWest® a specially designed box will be shipped for you to fill with spent lamps, this box comes complete with return shipping labels. Once the lamps are recycled a certificate of recycling will be mailed through to you, all this with the minimum cost and administrative burden.

- One price includes everything you need
- Convenience for small quantities and PMP's with storage limitations
- Reduces the chances of contamination by minimizing volumes of waste on-site
- Allows you to purchase recycling services based on your individual needs
- Allows for proper management with minimal handling of waste
- Eliminates the need to fill out mountains of complicated shipping documents
- Reduces administrative burden without reducing control from start to finish
- Establishes documented standard operating procedures (S.O.P.)
- Reduces your exposure when disposing of lamps on this program

For a complete list of what YOUR state requirements are for fluorescent lamp disposal contact us at:
